Stairtek's Retread has made refacing stairs easier, quicker, and more affordable.

retread

Features and Benefits of Retread:

1. Solid Hardwood Tread Cap

Competitive products are generally made of plywood covered with a face of thin veneer. Our solid tread is strong and stable. Plus, it can be refinished just like a traditional tread.

2. Minimal Impact on Rise

Retread refacing system mimics original stair geometry. Stairtek Retreads are more code friendly than traditional treads.

3. Superior Engineered Construction of Tread Cap and Nosing

Tongue and groove construction at the nosing increases the adhesive area by 40% greatly enhancing the adhesive bond.

7/16" Remodel Riser

Perfect companion to the Retread. Available in primed poplar and matching hardwood.

Stairtek's Installation Tool

Increases accuracy & speed during installation.
